DETAILED ACTION

Claim Objections

Claim 1 is objected to because of the following informalities:

Claim 1 ends with two periods. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The claimed invention is directed to an articulating boom which includes a drill which reciprocated along a linear path of a first member. It is not clear what structure facilitated this movement as the pair of links that are pivotally connected to one another and the drill would cause the drill to move in an arcuate path. It is acknowledged that the drill is constrained by a drill bit guide; however, since the guide interacts with the bit only, it does not constrain the drill to a linear movement.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3721

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites “first kinked member” on line 2, which is not disclosed in the specification.

It is unclear as to which of the element is referred to as the “first kinked member”.

Allowable Subject Matter

At this time , the claims appear to be allowable if the first and second paragraphs of 35 USC 112 rejection are overcome.

Conclusion

Refer to attachment for notice of references cited and recommended for consideration based on their disclosure of limitations of the claimed invention.
